EXPANDABLE TABLES PROGRAM

DMI Office's Expandable Conference Table program offers exceptionally handsome veneer and laminate conference tables with the flexibility of size to suit your conference needs. Not only are the tables designed for flexibility of size but they are also engineered to neatly accommodate cable management*. The program consists of ten basic components that allow you to create tables starting at 8' or 10' and expanding in 4' increments.

FEATURES:

- Each top has a pre-installed grommet.
- Veneer tables constructed of veneer, wood solids and wood product. Tops feature a UV finish for added protection.
- Laminate tables constructed of laminate on wood product with PVC vinyl edges.
- Included mending plates ensure proper top alignment and secure assembly (1).
- Each base has six adjustable levelers that also assist in correct alignment and assembly.
- Designed with rails providing stability, adding style and helping to conceal the functional wire management troughs (2).*
- Wire management troughs or trays provide aesthetically pleasing means to safely manage cables (3).*
- Base component designed with cable opening at the top (4) and vertical channel within the base to guide cables out through bottom of the base.*
- The cable opening in the top components are also positioned and sized to facilitate the installation of optional data ports/power centers (4).*

*Features (2), (3), and (4) do not apply to Fairplex Expandable Tables.

DATA PORT INSTALLATION POLICY

- DMI will offer data port installations for Power and Data ports (P&D ports) sold by DMI, in standard existing grommet locations on Expandable Tables, for a set installation price listed in our price list.
- DMI will provide installations of P&D ports not sold by DMI in the existing grommet holes for a 35% up charge to standard installation cost in price list, provided the client supplies detailed drawings of direction the ports are to be installed and exact dimensions of the port.
- DMI Standard Conference tables outside the Ex-table program, are not engineered for data ports. There is no wire management support on the table or table bases. DMI may agree to install ports to these tables for a 50% up charge to standard installation charge if the client provides detailed signed off drawings for dimensions and locations of the ports. In these cases, DMI reserves the right to move data port locations if the desired location will interfere with table base support.
- IN all cases, table orders with installed P&D ports are not cancellable.
